Our promise to you

At Birchington Dental Care we will:

- advise you how to achieve and maintain good oral health
- provide you with treatment options
- explain why a treatment is necessary and what it involves
- provide you with a full treatment plan and an estimate of costs before your treatment
- take the mystique out of dentistry by using terminology our patients understand

Payments and charges

All patients attending the practice will receive a treatment plan and an estimate of costs. Your treatment plan may need to be revised during the course of treatment.
Payment may be made in installments during the course of treatment by cash, cheque or with major debit and credit cards such as Visa, Mastercard and Maestro.
Certain treatments require payment of a proportion of the cost in advance.

Denplan Essentials
For an affordable fixed monthly payment, you will receive: two examinations, two hygiene appointments, all clinically necessary radiographs, along with 10% off the cost of fillings and extractions etc., and 20% off treatments that require laboratory work including dentures, crowns and bridgework.

Denplan Essential B
Has been created for patients with periodontal disease. All the benefits of Denplan essentials apply together with regular 3 monthly hygiene visits.

Childrens' Denplan
Provides two annual check-ups, dental health advice and education, preventive treatments, dental X-rays, scale and polish, discounts off fillings and sports guards. Your children will have the opportunity of spending time with our Oral Health Educator, Charlotte Lami, who will offer a one-to-one education session in an informal and fun setting.

General information

Every treatment is specific to each patient so these prices are only a guide. We will provide every patient with a plan detailing the treatment they require and the costs. You may wonder why we produce a price list if it doesn't show exact prices? We do so because our patients have asked us to help them understand what different treatments cost.

Other treatments

Dental treatments are bespoke, so a list of every treatment available would run to a list of thousands and would be confusing. Only the most common treatments have been listed. Any additional options can be quoted for once you have had your dental consultation.

Private treatment fees
